

# Serum Tears Made Simple.

**WHAT ARE VITAL TEARS™?** Vital Tears are autologous serum eye drops made from a patient's own blood that are prepared in our medical laboratory using our proprietary quality system.

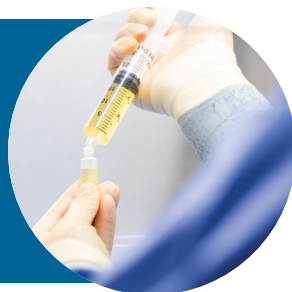

1

The process begins with your blood collection and order payment. We can help you find a blood collection facility near you or arrange for your blood to be drawn at home.

2

Highly trained clinical staff dilute your serum with preservative-free solution customized for you.

3

Vital Tears are shipped directly to you, as quickly as 48 hours after the blood collection.

**Vital Tears™**

## Who is **Vital Tears**?

We are passionate about helping patients get the serum tears they want quickly and conveniently.

Vital Tears was founded in 2015 out of a call by corneal specialists for a convenient and high-quality method of providing serum tears to their patients suffering from ocular surface conditions. Since our founding, we've provided Vital Tears to over 10,000 patients across the United States.
